**LIQUID OXYGEN: BREAKTHROUGH IN ACNE SCIENCE**

CHICAGO IL. - June 1, 2015 - Liquid Oxygen ( LiquidOxygen.com ) has developed a breakthrough Oxygen skin care science that is **"Clinically Proved Effective Day 1" for acne** and without the harmful chemical, benzoyl peroxide.

Bacteria and viruses associated with acne cannot survive in an Oxygen rich environment. Liquid Oxygen infuses its products with Oxygen to kill acne bacteria inside the pores. At the same time, Liquid Oxygen hydrates the skin by creating moisture barrier properties inside the cells to promote long term healing, and skin cell rejuvenation.

The result: Healthy, hydrated, acne free skin.

Liquid Oxygen does NOT use benzoyl peroxide, a harmful chemical that is widely used in acne skincare products. Benzoyl Peroxide can cause dark spots, and also dries out the skin which can create a rebound effect resulting in increased acne.

Developed by a board certified plastic surgeon, and skin scientist, Liquid Oxygen uses a unique proprietary formula that contains Oxygen, Salicylic acid, and Vitamins A, C, D, and E, each of which are vital to combat existing acne and prevent future breakouts. Salicylic acid acts as a natural exfoliator and acne treatment, while the vitamins protect from infection, and harmful UVA and UVB rays.

In an independent double blind clinical study conducted by one of the largest, most respected labs in the United States, Liquid Oxygen achieved the coveted Scientific category of:

"Statistically Significant results on Days 1, and 7 of the study"

Liquid Oxygen is proved more effective in reducing acne lesion counts and improving the skin's overall appearance as compared against a major leading acne brand that uses benzoyl peroxide.

Liquid Oxygen's clinically proved science, and benzoyl peroxide free, paraben free, formula, makes it suitable for all skin types - and especially for sensitive skin. The 1, 2, 3 step system is easy to use and available in a travel size.

Liquid Oxygen gives users the healthy, clear skin, and confidence they have been waiting for and deserve.
